🐦 @SYNTHESYSEU

[www.synthesys.info](http://www.synthesys.info)

From GA:

- Obligation to disseminate results
- Notice to other beneficiaries
- Scientific publications must be open access
- Each deliverable has a dissemination level
- Must display EU emblem + acknowledgement:  
*“This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 823827”.*

Each beneficiary to have dissemination representative

Standing item on EB & PC meetings

Please cite  
**SYNTHESYS+**  
*(and tell us)*

- Facebook
- Twitter (@SynthesysEU)
- SYNTHESYS & institutional websites
- Updated trifold (*please take some*)
  - *Key messaging*
- Access Poster
- Press release
  - [http://bit.ly/SYNTHESYS\\_press](http://bit.ly/SYNTHESYS_press)

NA5 workshops

Plus...

- Hackathons
- Unconference sessions
- Internal seminars by Access Users
- Participation in advisory bodies
- Trade fairs

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• Participation in news and other broadcast media (e.g. TV documentaries)</li><li>• Web multimedia videos</li><li>• Press and magazine articles</li><li>• Blogs and improved use of social media</li><li>• Engagement of high profile external speakers within SYNTHESYS+ events</li></ul> | <ul style="list-style-type: none"><li>• Conference presentations to new user communities</li><li>• Policy focused events with national government and EC representatives</li><li>• Pop-up events at exhibitions and technology fora</li><li>• Engagement in public science festivals</li></ul> |
|--|--|

Plus...

- Coordinate with us ([synthesys@nhm.ac.uk](mailto:synthesys@nhm.ac.uk))
- Work with your Press Offices
- Let us know!

*Think differently & align with other events!*

## Why “publish” milestones and deliverables?

- Incentivise engagement with SYNTHESYS reporting
- Facilitate better review procedures
- Improve quality
- Improve coordination
- FAIRer (more finable, accessible...)
- Simpler (APC covered, templated)
- *Must not preclude publication in other locations!*

## Why Research Ideas & Outcomes (RIO)...

- Publishes all outputs of the research cycle
  - *proposal, data, methods, workflows, software, reports & articles*
- Single collaborative platform (ARPHA writing tool)
  - *collaborative authoring, reviewing and publishing in one place*
- Low cost (APC for all outputs for €6k)
  - *36 deliverables and further 46 milestones*
  - *plus other outputs at our discretion*
- History with our community
- Community familiarity with ARPHA

Online authoring	Online collaboration	Integrated services
 Write a manuscript online	 Work with co-authors and peers	 Online import of references/data
 Easy online revisions and editing	 Pre-submission external reviews	 Import manuscripts via XML/API
 Submit it at a click of a button	 Automated technical validation	 Export manuscripts as XML/PDF

## SYNTHESYS+ Reporting Tasks

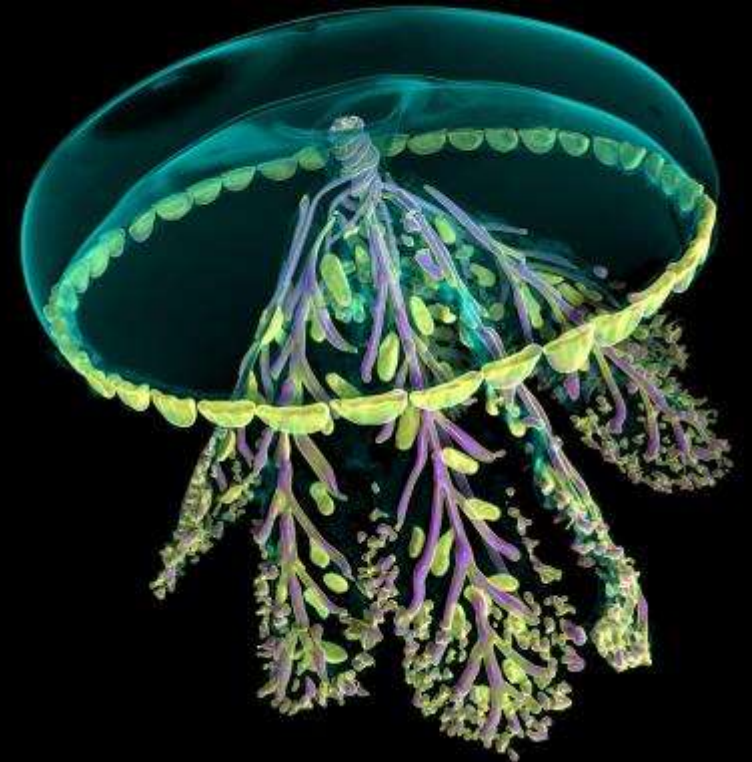

- Establish review procedures & instructions to Eds & authors
  - *Based on existing SYNTH+ structure, incorporate non-consortium reviewers?*
- Establish soft timeline expectations?
  - Milestones (outline 2 weeks prior to due date)
  - Deliverables (outline 4 weeks prior to due date)
  - Periodic and final reports (by deadline?)
- Establish exceptions to open publishing
  - What should we hold back (financial & personal info)
- Establish templates (or at least encourage more standardised reporting)?
- Establish relationship with teamwork
  - Link documents in under tasks (never duplicate work)
- Prepare an introduction to the series
  - Based on a summery version of paper
  - Agree that we are all authors?

# SYNTHESYS+

Synthesis of Systematic Resources

a DiSSCo project

**Any questions?**
